Independent Auditor's Report

To the Shareholders of Prudential Life Assurance (Thailand) Public Company Limited

Opinion

I have audited the financial statements of Prudential Life Assurance (Thailand) Public Company Limited (the "Company"), which comprise the statement of financial position as at 31 December 2018, the statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

In my opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2018 and its financial performance and cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRSs).

Basis for Opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of my report. I am independent of the Company in accordance with the Code of Ethics for Professional Accountants issued by the Federation of Accounting Professions that is relevant to my audit of the financial statements, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the correction be made.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with TFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

Prudential Life Assurance (Thailand) Public Company Limited Notes to the financial statements

For the year ended 31 December 2018

These notes form an integral part of the financial statements.

The financial statements issued for Thai statutory and regulatory reporting purposes are prepared in the Thai language. These English language financial statements have been prepared from the Thai language statutory financial statements. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

These financial statements were approved and authorised for issue by the Board of Directors on 13 March 2019.

1 General information

Prudential Life Assurance (Thailand) Public Company Limited, (the "Company"), is incorporated in Thailand and has its registered office at @Sathorn Building, 20th - 27th Floors, 9/9 South Sathorn Road, Yannawa, Sathorn, Bangkok. The Company has 1 branch (2017: 1 branch).

The immediate and ultimate parent companies during the financial year were Staple Limited (51.2% shareholding) which was incorporated in Thailand, and Prudential Plc. which was incorporated in the United Kingdom, respectively.

The principal activity of the Company is to operate life assurance. Details of the Company's subsidiary as at 31 December 2018 and 2017 are given in notes 8 and 24.

2 Basis of preparation of the financial statements

(a) Statement of compliance

The financial statements are prepared in accordance with Thai Financial Reporting Standards (TFRSs), guidelines promulgated by the Federation of Accounting Professions and the Notification of the Office of Insurance Commission regarding "Rules, Procedures, Conditions and Timing for the Preparation and Submission of the Financial Statements and Reporting the Operations of Life Insurance Companies" B.E 2559, dated 4 March 2016.

The new and revised TFRSs effective for annual accounting periods beginning on or after 1 January 2018. The initial application of these new and revised TFRSs has resulted in changes in certain of the Company's accounting policies. These changes have no material effect on the financial statements.

In addition a number of new and revised TFRSs are not yet effective for current periods. The Company has not early adopted these standards in preparing these financial statements. Those new and revised TFRSs that are relevant to the Company's operations are disclosed in note 29.

(b) Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following items:

Itan	•0
uen	15

Derivative financial instruments
Trading and available-for-sale investments
Investment assets where policyholders bear
the investment risk

Measurement bases

Fair value Fair value Fair value

Prudential Life Assurance (Thailand) Public Company Limited Notes to the financial statements

For the year ended 31 December 2018

Functional and presentation currency (c)

The financial statements are prepared and presented in Thai Baht, which is the Company's functional currency. All financial information presented in Thai Baht has been rounded in the notes to the financial statements to the nearest thousand unless otherwise stated.

(d) Use of judgements and estimates

The preparation of financial statements in conformity with TFRSs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Assumptions and estimation uncertainties

Information about assumption and estimation uncertainties that have a significant risk of resulting in a material adjustments to the carrying amounts of assets and liabilities at the reporting date is included in the following notes:

Note 13 Insurance contract liabilities Note 14 Investment contract liabilities

Long-term technical reserves

The Company determines the long-term technical reserves based on the Net Level Premium Valuation method (NPV). The carrying amount as at the reporting date is provided in note 13.

Process involved in determining assumptions

The Company determines assumptions in relation to mortality, morbidity and pricing rates that were established at the time when insurance products were designed and as approved by the Office of Insurance Commission. These assumptions are locked-in and used for calculating the liabilities over the life of the contract. This year, there is no change in assumption from last year.

Short-term technical reserves

Short-term technical reserves consist of loss reserve, outstanding claims and premium reserves. The carrying amount as at the reporting date is provided in note 13.

Process involved in determining assumptions

The Company determines the loss reserves and outstanding claims in accordance with the Company's claim assessment. The assumptions used in the estimation are intended to result in provisions which are sufficient to cover any liabilities arising out of insurance contracts to the extent that can be reasonably foreseen.

However, given the uncertainty in establishing a provision for insurance claims, it is likely that the final outcome could prove to be significantly different from the original liability established.

Provision is made at the reporting date for the expected ultimate cost of settlement of all claims incurred in respect of events up to that date, whether reported or not.

Prudential Life Assurance (Thailand) Public Company Limited

Notes to the financial statements

For the year ended 31 December 2018

The Company uses "Bornhuetter-Ferguson" method, "Chain Ladder" method and "Expected Loss Ratio" method to estimate claims incurred but not reported depending on the maturity of a particular line of business and the type of business written.

Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

Further information about the methods and assumptions made in measuring fair values is disclosed in note 23.

3 Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

(a) Exemption from consolidation

The Company has not prepared consolidated financial statements for the year ended 31 December 2018 and 2017; in accordance with the Thai Accounting Standard No.27 (revised 2017) Separate Financial Statements and Thai Financial Reporting Standard No.10 (revised 2017) Consolidated Financial Statements. The Company had informed all its common shareholders that management intend to present the Company's financial statements on a non-consolidated basis, and no objections were raised. The results of the Company are consolidated into the financial statements of its ultimate parent company, Prudential Plc.

(b) Foreign currencies

Transactions in foreign currencies

Transactions in foreign currencies are translated to the functional currency at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rates at the reporting date. Foreign exchange differences arising from translation are recognised in profit or loss.

Non-monetary assets and liabilities measured at cost in foreign currencies are translated to the functional currency at the exchange rates at the dates of the transactions.

(c) Derivative financial instruments

Derivative financial instruments are used to manage exposure to foreign exchange and interest rate risks arising from investment activities. Derivative financial instruments are not used for trading purposes.

Derivatives are recognised initially at fair value; attributable transaction costs are recognised in profit or loss when incurred. Subsequent to initial recognition, they are remeasured at fair value. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss. The fair value of derivatives is based on valuation techniques, including discounted cash flow models.

13

Prudential Life Assurance (Thailand) Public Company Limited

Notes to the financial statements

For the year ended 31 December 2018

(d) Cash and cash equivalents

Cash and cash equivalents in the statements of cash flows comprise cash balances, call deposits and highly liquid short-term investments.

(e) Classification of insurance and investment contracts

The Company issues insurance contracts that transfer insurance risk. These are classified as insurance contracts.

Insurance contracts are those contracts under which the Company accepts significant insurance risk from the policyholder by agreeing to compensate the policyholder or other beneficiary if a specified uncertain future event adversely affects the policyholder or other beneficiary. Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period.

Investment contracts are those contracts that transfer financial risk with no significant insurance risk.

The Company defines as significant insurance risk the possibility of having to pay benefits on the occurrence of as insured event that are at least significant level more that the benefits payable if the insured event did not occur.

(f) Recognition and measurement of insurance contracts

Premiums receivables

Premiums receivables are stated at their invoice value less allowance for doubtful accounts.

The allowance for doubtful accounts is assessed primarily on analysis of payment histories and future expectations of customer payments. Bad debts are written off when incurred

For individual policies that have the cash value and overdue more than the grace period, the premiums receivables will be settled by granting automatic policy loans where the cash value is greater than the amount due.

Long-term technical reserves

A liability for contractual benefits and claims that are expected to be incurred in the future is recorded when the premiums are recognised and is released when benefit and claims are incurred. The liability is measured using assumptions considered to be appropriate for the policies in force and calculated by the internal actuary of the Company and using the "Net Premium Valuation" method.

Loss reserves and outstanding claims

Loss reserves and outstanding claims are recorded for the estimated cost of all claims notified but not settled at the reporting date, using the information available at the time. In addition, a loss reserve is also made for the cost of claims incurred but not reported as at the reporting date based on the Company's experience and historical data. Differences between the provision for loss reserves and outstanding claims at the reporting date and subsequent revisions and settlements are included in the profit or loss.

Premium reserves

The premium reserves comprises of the unearned premium reserve and unexpired risk reserve.

Prudential Life Assurance (Thailand) Public Company Limited Notes to the financial statements

For the year ended 31 December 2018

Unearned premium reserve

The unearned premium reserve for group insurance, short-term riders and short-term insurance which are calculated based on a pro-rata basis of the premium based on the remaining duration of each policy.

Unexpired risks reserve

Unexpired risks reserve is the reserve for the claims, which may occur, of the in-force policy. Unexpired risks reserve is set aside using an actuarial method. The reserve is calculated as the best estimate of the claims, which are expected to occur during the remaining coverage periods, based on the historical claims data.

Premium written and premium earned

Short-term insurance contracts

Premium written is recognised as revenue on the inception date and are presented gross of premium ceded and commissions and brokerage expenses.

Premium earned comprises of premium written during the year and change in unearned premium reserves and is recognised as revenue proportionally over the period of coverage of insurance policy.

Long-term insurance contracts

First year gross premium written is recognised on the effective date. Renewal gross premium written is recognised when premium is due, only if the policy is still in force. First year gross premium written and renewal gross premium written are presented gross of premium ceded and commissions and brokerage expenses.

Premium received in advance is not recognised until the due date.

Commissions and brokerage expenses

Commissions and brokerage expenses are recognised as expenses when incurred.

Benefits, claims and loss adjustment expenses

Benefits, claims and loss adjustment expenses consist of benefits, claims and losses adjustment paid during the years, net of changes in provision for short-term insurance claims. They are recognised as expense in profit or loss when incurred

Reinsurance

Assets, liabilities, income and expense arising from reinsurance contracts are presented separately from the assets, liabilities, income and expense from the related insurance contracts because the reinsurance arrangements do not relieve the Company from its direct obligations to its policyholders.

Premium ceded, reinsurer's share of change in unearned premium reserve, commission income and benefits, claims and loss adjustment expenses recovered from reinsurers are reognised as expense or revenue in accordance with the pattern of reinsurance service received when incurred.

Prudential Life Assurance (Thailand) Public Company Limited

Notes to the financial statements

For the year ended 31 December 2018

An asset or liability is recognised in the statement of financial position representing reinsurance receivables, reinsurer's share of insurance contract liabilities and reinsurance payables. The net amount is presented in the statement financial position only when the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously. The measurement of reinsurance assets is consistent with the measurement of the underlying insurance contracts.

Amounts recoverable under reinsurance contracts are assessed for impairment at reporting date. Such assets are deemed impaired if there is objective evidence, as a result of an event that occurred after its initial recognition, that the Company may not recover all amounts due and that the event has a reliably measurable impact on the amounts that the Company will receive from the reinsurer.

Liability adequacy test

Short-term insurance contracts

The liability of the Company under short-term insurance contracts is tested for adequacy by comparing the best estimate using an actuarial method with the carrying amount of unearned premiums reserve at the reporting date. Where an expected shortfall is identified, additional provisions are made for unearned premiums and are recognised in profit or loss.

Long-term insurance contracts

The liability of the Company under long-term insurance contracts is tested for adequacy by comparing the best estimate of future contractual cash flows by using current best estimate assumptions with the carrying amount of long-term technical reserves at the reporting date. Where an expected shortfall is identified, additional provisions are made for long-term technical reserves are recognised in profit or loss.

An additional provision for liability inadequacy is made where the reserves are calculated by using actuarial method "Gross Premium Valuation" based on current assumptions of policies in force at the reporting date exceeds the liabilities calculated by using Net Premium Valuation method.

Unbundling of deposit components

Some insurance contracts contain both insurance component and a deposit component. In some cases, an insurer is required or permitted to unbundle those components:

The Company's accounting policy requires unbundling a deposit component if both the following conditions are met:

- (1) the Company can measure the deposit component (including any embedded surrender options) separately (i.e. without considering the insurance component) and
- (2) The Company's accounting policies do not otherwise require it to recognise all obligations and rights arising from the deposit component.

(g) Investments in securities

Investments in debt and equity securities

Debt securities and marketable equity securities held for trading are stated at fair value with any resultant gain or loss recognised in profit or loss.

Prudential Life Assurance (Thailand) Public Company Limited

Notes to the financial statements

For the year ended 31 December 2018

Debt securities that the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are stated at amortised cost, less any impairment losses. The difference between the acquisition cost and redemption value of such debt securities is amortised using the effective interest rate method over the period to maturity.

Debt securities and marketable equity securities, other than those securities held for trading or intended to be held to maturity, are classified as available-for-sale investments. Available-for-sale investments are, subsequent to initial recognition, stated at fair value and change therein, other than impairment losses and foreign currency differences on available-for-sale monetary items, are recognised directly in equity. Impairment losses and foreign exchange differences are recognised in profit or loss. When these investments are derecognised, the cumulative gain or loss previously recognised directly in equity is recognised in profit or loss. Where these investments are interest-bearing, interest calculated using the effective interest method is recognised in profit or loss.

Equity securities which are not marketable are stated at cost less any impairment losses.

Initial recognition

Purchases and sales of investments are initially recognized on trade date which is the date that the Company commits to purchase or sell the investments.

Disposal of investments

On disposal of an investment, the difference between net disposal proceeds and the carrying amount together with the associated cumulative gain or loss that was reported in equity is recognised in profit or loss.

If the Company disposes of part of its holding of a particular investment, the deemed cost of the part sold is determined using the weighted average method applied to the carrying value of the total holding of the investment.

(h) Investment in subsidiary

Subsidiaries are entities controlled by the Company. The Company controls an entity when it is exposed to or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Investments in subsidiaries are accounted for using the cost method.

(i) Loans

Loans are stated at the principal amounts less allowance for doubtful accounts.

The Company provides an allowance for doubtful accounts based on the overdue period and the collateral value.

(j) Premises and equipment

Recognition and measurement

Owned assets

Land is measured at cost less impairment losses. Building and equipment are stated at cost less accumulated depreciation and impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located, and capitalised borrowing costs. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When separate parts of building and equipment have different useful lives, they are accounted for individually (major components).

Any gains and losses on disposal of an item of premises and equipment are determined by comparing the proceeds from disposal with the carrying amount of premises and equipment, and are recognised net within other income in profit or loss.

Subsequent costs

The cost of replacing a part of an item of premise and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company, and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of premise and equipment are recognised in profit or loss as incurred.

Depreciation

Depreciation is calculated based on the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value.

Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of each component of an item of building and equipment. The estimated useful lives are as follows:

Buildings	20	years
Buildings improvements	5	years
Leasehold improvements	5 and 9	years
Office equipment and furniture	5	years
Motor vehicles	5	years

No depreciation is provided on freehold land or assets under construction.

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

(k) Intangible assets

Software licences

Software licences that are acquired by the Company and have finite useful lives are stated at cost less accumulated amortisation and impairment losses. Software licences are amortised in profit or loss on a straight-line basis over their estimated useful lives from the date that they are available for use. The estimated useful lives is 5 years.

No amoritsation is provided on intangible assets under installation.

Prudential Life Assurance (Thailand) Public Company Limited Notes to the financial statements

For the year ended 31 December 2018

Bancassurance agreements

Bancassurance agreements recognised in intangible asset are stated at cost less accumulated amortisation and accumulated impairment losses (if any). They are being amortised in profit or loss based on achievement of performance targets over the life of the agreements, which is between 15-18 years.

Performance targets, amortisation methods, useful lives and residual rates are reviewed at each financial year-end and adjusted as appropriate.

(l) Impairment

The carrying amounts of the Company's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. The impairment loss is recognised in profit or loss unless it reverses a previous revaluation credited to equity, in which case it is charged to equity.

When a decline in the fair value of an available-for-sale financial asset has been recognised directly in equity and there is objective evidence that the value of the asset is impaired, the cumulative loss that had been recognised directly in equity is recognised in profit or loss even though the financial asset has not been derecognised. The amount of the cumulative loss that is recognised in profit or loss is the difference between the acquisition cost and current fair value, less any impairment loss on that financial asset previously recognised in profit or loss.

Calculation of recoverable amount

The recoverable amount of held-to-maturity securities carried at amortised cost is calculated as the present value of the estimated future cash flows discounted at the original effective interest rate. Receivables with a short duration are not discounted.

The recoverable amount of available-for-sale financial assets is calculated by reference to the fair value.

The recoverable amount of a non-financial asset is the greater of the assets' value in use and fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Reversals of impairment

An impairment loss in respect of a financial asset is reversed if the subsequent increase in recoverable amount can be related objectively to an event occurring after the impairment loss was recognised in profit or loss. For financial assets carried at amortised cost and available-for-sale financial assets that are debt securities, the reversal is recognised in profit or loss. For available-for-sale financial assets that are equity securities, the reversal is recognised in other comprehensive income.

Impairment losses recognised in prior periods in respect of other non-financial assets are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

19

(m) Due to reinsurers and other accounts payable

Due to reinsurers and other accounts payable are stated at cost.

(n) Employee benefits

Defined contribution plans

Obligations for contributions to defined contribution plans are personnel expensed as the related service is provided.

Defined benefit plans

The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount.

The calculation of defined benefit obligations is performed by a qualified actuary using the projected unit credit method.

Remeasurements of the net defined benefit liability, actuarial gain or loss are recognised immediately in other comprehensive income. The Company determines the interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(o) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

(p) Revenue

Interest and dividend income

Interest income is recognised in the statement of income as it accrues, except when interest is in arrears for more than 6 months when it is recognised on a cash basis. Dividend income is recognised in profit or loss on the date the Company's right to receive payments is established which in the case of quoted marketable securities is usually the ex-dividend date.

Prudential Life Assurance (Thailand) Public Company Limited

Notes to the financial statements

For the year ended 31 December 2018

(q) Expenses

Lease payments

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease.

(r) Income tax expense

Income tax expense for the year comprises current and deferred tax. Current and deferred tax are recognised in profit or loss except to the extent that they relate to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of goodwill; the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss; and differences relating to investments in subsidiaries and jointly-controlled entities to the extent that it is probable that they will not reverse in the foreseeable future.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

In determining the amount of current and deferred tax, the Company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. The Company believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of many factors, including interpretations of tax law and prior experience. This assessment relies on estimates and assumptions and may involve a series of judgements about future events. New information may become available that causes the Company to change its judgement regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(s) Earnings per share

The Company presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

4 Cash and cash equivalents

	2018	2017
	(in thousa	nd Baht)
Cash on hand	1,370	1,755
Deposits at banks - call deposits	1,357,587	1,870,115
Deposits at banks - time deposits	**	1,260,000
Total	1,358,957	3,131,870

As at 31 December 2018 and 2017, cash and cash equivalents were denominated entirely in Thai Baht.

5 Premiums due and uncollected

As at 31 December 2018 and 2017, the balances of premiums due and uncollected are classified by aging as follows:

	2018	2017
	(in thousa	md Baht)
Within due	448,835	410,042
Overdue		
Not over than 30 days	60,329	72,092
31 - 60 days	206	380
61 - 90 days	59	332
91 days - 1 year	409	339
over 1 year	<u>39</u>	468
Total	509,877	483,653
Less allowance for doubtful accounts	(387)	(1,218)
Net	509,490	482,435

The Company has established procedures for following up on the collection of premiums due and uncollected from agents and brokers to ensure it is made within the credit terms. Legal action is taken against agents and brokers on a case-by-case basis when premiums due and uncollected are overdue.

The holders of ordinary shares are entitled to receive dividends as declared from time to time, and are entitled to one vote per share at meetings of the Company.

16 Reserves

Legal reserve

Section 116 of the Public Companies Act B.E. 2535 requires that a public company shall allocate not less than 5% of its annual net profit, less any accumulated losses brought forward, to a reserve account ("legal reserve"), until this account reaches an amount not less than 10% of the registered authorised capital. The legal reserve is not available for dividend distribution.

Other components of equity

Fair value changes in available-for-sale securities

The fair value changes in available-for-sale securities account within equity comprises the cumulative net changes in the fair value of available-for-sale securities until securities are derecognised or impaired.

21 Basic earnings per share

The calculations of basic earnings per share for the years ended 31 December 2018 and 2017 were based on the profit the years attributable to ordinary shareholders of the Company and the ordinary shares outstanding during the years as follows:

Basic earnings per share (in Baht)	0.64	0.82
Number of ordinary shares outstanding	2,211,153	2,211,153
Profit for the year attributable to ordinary shareholders of the company (basic)	1,420,010	1,805,553
D. St. S., st stailbytchie to outlinews	2018	2017

22 Dividends

(a) On 18 April 2018, the Company received the approval from the Office of Insurance Commission to pay the dividend to shareholders at the amount not exceeding Baht 1,827 million.

At the Company's Annual General Meeting of the shareholders held on 27 April 2018, the shareholders unanimously resolved the appropriation of dividend amounting to Baht 1,813 million or Baht 0.82 per share. The dividend was paid out from the Company's net profit for the year 2017 and unappropriated retain earnings to shareholders in May 2018.

(b) At the Company's Annual General Meeting of the shareholders held on 24 April 2017, the shareholders unanimously resolve the appropriation of dividend not exceeding Baht 1,908 million.

On 26 April 2017, the Company received the approval from the office of Insurance Commission to pay the dividend to shareholders at the amount not exceeding Baht 1,296 million or Baht 0.58 per share. The dividend amounting to Baht 1,282 million or Baht 0.58 per share was paid out from the Company's net profit for the year 2016 to shareholders in May 2017.

23 Insurance and financial risk management

23.1 Financial risk management policies

The Company is exposed to normal business risks from changes in market interest rates and currency exchange rates and from non-performance of contractual obligations by counterparties. The Company does not hold or issue derivative financial instruments for speculative or trading purposes.

Risk management is integral to the whole business of the Company. The Company has a system of controls in place to create an acceptable balance between the cost of risks occurring and the cost of managing the risks. The management continually monitors the Company's risk management process to ensure that an appropriate balance between risk and control is achieved.

23.2 Insurance risk management

Insurance risk is the risk under any one insurance contract which is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance contract liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the level established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. Risks that are specific to the various types of insurance contracts are elaborated as follows:

23,2,1 Underwriting risks

For contracts where death is the insured risk, the most significant factors that could increase the overall frequency of claims are epidemics or widespread changes in lifestyle, such as eating, smoking and exercise habits, resulting in earlier or more claims than expected. For contracts where survival is the insured risk and the most significant factor is continued improvement in medical science and social conditions that would increase longevity.

The underwriting strategy is intended to ensure that the risks underwritten are well diversified in terms of the type of risk and the level of insured benefits. The risk selection process determines the groups of insurance risk that are acceptable to the Company so that diversification of insurance risk types is achieved. At the same time, this is to ensure within each of these risk types, there is a sufficiently large population of risks to reduce the variability of the expected outcome.

Each group of insurance risks is classified into categories of standard and degree of substandard through underwriting. Medical selection and financial underwriting guidelines included in the Company's underwriting procedures allow the correct assignment of insurance risk to the appropriate classes. Each class has varied premium to reflect the health condition and family medical history of the applicants.

Claims risk

Claims risk refers to the possibility that the frequency or severity of claims arising from insurance contracts exceeds the level assumed when the products were priced.

Claim trends are monitored on an ongoing basis. Exposure to large claims is managed by establishing policy retention limits, which vary by products. Policies in excess of the limits are reinsured with other companies.

Mortality and morbidity is monitored monthly and the overall experience was within the Company's assumptions used in "Gross premium valuation" reserve calculation.

Investment returns

The Company's policy of closely matching the cash flows of assets with those of the corresponding liabilities is designed to mitigate the Company's exposure to future changes in interest rates. The interest rate risk positions are monitored on an ongoing basis due to the mismatch of assets and corresponding liabilities, which reduces capital adequacy ratio.

Policyholder behaviour

The Company seeks to design products that minimize financial exposure to lapse, surrender and other policyholder behaviour risk. The Company monitors lapse, surrender and other policyholder behaviour experience. Policyholder behaviour experience was when compared to the Company's assumptions used in the "Gross premium valuation" reserve calculation.

Expense overrun risk

The Company prices its products to cover the expected costs of servicing and maintaining them. The Company monitors expenses monthly, including comparisons of actual expenses to expense levels allowed for in pricing and valuation.

In pricing insurance products the Company manages expense overrun risk by allowing for an appropriate level of expenses that reflects a realistic medium-term to long-term view of the underlying cost structure. A disciplined expense budgeting and management process is followed that controls expenses within product pricing allowances over the medium to long term.

23.2.2 Concentration of insurance risk

Concentrations of risk may arise where a particular event or a series of events could impact heavily upon the Company's insurance contract liabilities. Such concentrations may arise from a single insurance contract or through a small number of related contracts, and relate to circumstances where significant liabilities could arise.

Insurance risk for contracts is also affected by the policyholders' right to pay reduced or no future premiums, or to terminate the contract completely. As a result, the amount of insurance risk is also subject to policyholder behaviour. On the assumption that policyholders will make decisions rationally, overall insurance risk can be assumed to be aggravated by such behaviour. The Company has factored the impact of policyholders' behaviour into the assumptions used to measure insurance contract liabilities.

The Company has life insurance for participating and non-participating contracts with guaranteed benefits. The amount of risk to which the Company is exposed depends on the level of guarantees inherent in the contracts and the current interest rate. The changes in interest rate will not cause a change to the amount of the liability, unless the change is material enough to trigger a liability adequacy test adjustment.

As at 31 December 2018, the discount interest rates for the purpose of the liability adequacy test, in accordance with industry practice, is the average of eight quarters of the zero coupon Thailand government bond yield curve plus illiquidity premium of 25-43 basis points (31 December 2017: 25-42 basis points). Management monitors the sensitivity to changes in rates on an ongoing basis. A decrease of 190 basis points from current market interest rates would not be trigger a liability adequacy test adjustment.

23.3 Capital management

The Company's capital management policy is to maintain a strong capital base to meet policyholders' obligations and the requirements of the Office of Insurance Commission, to create shareholder value and deliver sustainable returns to shareholders. The Company performed its own risk and solvency assessment (ORSA) incorporating with its business plan, company key risk, and capital management, taking into account strategic risks and external factors which could negatively affect capital adequacy. Capital management is one of the key responsibilities of Asset and Liability Committee (ALCO). The Company activities to effectively monitor and test our capital sufficiency on a regular basis include but not limited to

- Testing capital adequacy in 3 years Business Plan;
- Regularly testing and forward projection of capital adequacy based on going concern basis and economic downturn; and
- The sensitivity test on any significant changes to assess the impact of key risk variables for better informed decisions.

In accordance with and the requirements of the Office of Insurance Commission, all insurers are required to maintain a minimum at least 140% of capital adequacy ratio. It is the Company's policy to hold capital levels in excess of minimum requirement.

23.4 Interest rate risk

Interest rate risk is the risk that future movements in market interest rates will affect the results of the Company's operations and its cash flows.

At 31 December 2018 and 2017, the significant financial assets classified by type of interest rate were as follows:

		2	018	
		Floating		
	Non-interest	interest	Fixed interest	
	bearing	rate	rate	Total
	Ü	(in thou	sand Baht)	
Cash and cash equivalents	41,644	1,317,313	-	1,358,957

Total	59,126	3,694,653	85,821,535	89,575,314

At 31 December 2018 and 2017, the significant financial assets carrying interest rate at fixed rates were classified, according to the period from the reporting date to the maturity date. The details were as follows:

				2018		
	Average interest rate (% per annum)	No maturity	Within 1 year	After 1 year but within 5 years (in thousand Baht)	After 5 years	Total
Investment in						
securities Bonds	3.52		3,459,923	3,524,637	36,262,458	43,247,018
Debentures	3.94	_	767,950	8,890,412	26,287,430	35,945,792
Notes	4.10	_	707,230	0,070,112	1,152,594	1,152,594
Policy loans	4.00-8.00	2,209,155	-	-	<u>.</u>	2,209,155
Total		2,209,155	4,227,873	12,415,049	63,702,482	82,554,559
				2017		
				2017		
	Average			After I year		
	interest rate (% per	No	Within	but within		
	annum)	maturity	l year	5 years	After 5 years	Total
	amunj	щашку	1 Jun	(in thousand Baht	-	20002
Cash and cash				,		
equivalent	0.64	•	1,260,000	-	-	1,260,000
Investment in						
securities					41.070.740	40 160 531
Bonds	3.46	-	4,598,152	2,201,730	41,360,649	48,160,531
Debentures	4.10	•	413,262	7,075,507	25,702,303	33,191,072
Notes	4.10	-	-	-	1,182,990	1,182,990
Policy loans	4.00-8.00	2,026,942				2,026,942
Total		2,026,942	6,271,414	9,277,237	68,245,942	85,821,535

Policy loans are fully collateralised by the value of the underlying policy and carry interest rates which follow the regulations of the Office of Insurance Commission. The average rate of interest in the year ended 31 December 2018 was 4.00% - 8.00% per annum (2017: 4.00% - 8.00% per annum). The contractual maturity of these loans would generally follow the maturity profile of the underlying insurance policy with which they are associated. Policyholders may repay policy loans prior to maturity.

23.5 Foreign currency risk

The Company is exposed to foreign currency risk relating to settlement of financial assets and financial liabilities which are denominated in foreign currencies.

At 31 December 2018 and 2017, the Company were exposed to foreign currency risk in respect of financial assets and liabilities denominated in the following currencies:

	Note	2018	2017
		(in thousa	nd Baht)
Investment in securities (US Dollars)	6.1	17,246,121	5,625,743
Gross risk exposure in the statements of financial position		17,246,121	5,625,743
Notional amount of foreign exchange forward contracts	27 (c)	(16,120,142)	(5,596,268)
Notional amount of cross currency swap contracts	27 (c)	(349,272)	(349,272)
Net risk exposure		776,707	(319,797)
Other payable - related parties (Hong Kong Dollars)	24	115,379	2,025
Other payable - related parties (US Dollars)	24	43,856	1,437
Other payable - related parties (Ringgit)	24		24
Accrued consulting fee - Related Parties (Singapore Dollars)	24	19,210	26,015
Gross risk exposure in the statements of financial position		178,445	29,501

23.6 Credit risk

Credit risk is the potential financial loss resulting from the failure of a customer or counterparty to settle its financial and contractual obligations to the Company as and when they fall due.

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. Credit evaluations are performed on all debt securities of customers requiring credit over a certain amount. At the reporting date there were no significant concentrations of credit risk. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the reporting date.

23.7 Equity price risk

The exposure to equities is managed carefully in accordance with the Company's asset allocations. The asset allocations are designed with consideration to liabilities' obligations, capital requirements, and mandates from the Company's external regulators and its monitored on an ongoing basis.

The nature of the Company's exposures to equity risk and its objectives, policies and processes for managing equity risk have not changed significantly from the prior period.

23.8 Liquidity risk

The Company monitors its liquidity risk and maintains a level of cash and cash equivalents deemed adequate by management to finance the Company's operations and to mitigate the effects of fluctuations in cash flows.

The Company's non-cash financial assets mainly comprise cash and cash equivalents, deposits with financial institutions and investments in securities which are highly liquid and are able to be sold quickly at close to their fair value when the Company wishes to raise funds.

The following tables show information about the estimated timing of the undiscounted net cash flows from the Company's insurance and investment contract liabilities. The analysis provided is by estimating timing, of the amounts recognised in the statement of financial position.

		Estima	ted <u>undiscour</u>	ited net cash	flows

31 December 2017 Liabilities Insurance and investment						
contracts liabilities	97,783,992	9.5	43.1	26.0	21.4	100.0

23.9 Fair values of financial assets and liabilities

Fair value hierarchy

Analyses recurring fair value measurements for financial assets and financial liabilities. These fair value measurements are categorised into different levels in the fair value hierarchy based on the inputs to valuation techniques used. The different levels are defined as follows.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: input for the asset or liability that are not based on observable market data (unobservable inputs).

The Company recognises transfers between levels of the fair value hierarchy as of the end of reporting period during which the transfer has occurred. There were no transfers between levels of the fair value hierarchy during the year ended 31 December 2018 and 2017.

The following methods and assumptions were used by the Company in estimating fair value of financial assets and financial liabilities as disclosed herein.

The carrying value of these financial instruments, cash and cash equivalents, accrued investment income, premiums due and uncollected, loans, due to reinsurers, unpaid policy benefit loss reserves and outstand claim and other payables approximates the fair value.

The Company determines Level 2 fair values for debt securities using the clean price on last day of the period provided by the Thai Bond Market Association and foreign issued debt securities are based on broker quotes.

The Company determines Level 2 fair values for unit trusts using the net asset value (NAV) on the last business day of the period provided by assets management companies.

The Company determines Level 2 fair values for promissory notes using discounted cash flow technique, which uses contractual cash flows and a market - related discount rate.

Level 2 fair values for simple over-the-counter derivative financial instruments are based on broker quotes.

23.9.1 Financial assets carried at fair value.

The Company have an established control framework with respect to the measurement of fair values. This is to ensure that prudent revaluation principles and proper internal control procedures are in place.

The following table analyses significant financial assets carried at fair value at the reporting date, by the level in the fair value hierarchy into which the fair value measurement is categorised.

	Fair value

Significant agreements with related parties

Investment Management Agreements

The Company has entered into an Investment Management Agreement with an affiliate of the Prudential Group. The affiliate agreed to act as the Company's investment manager and provide dealing services. The Company is committed to pay a management fee at the rate in agreements. These agreements can be terminated upon 3 months written notice.

Service agreements

During the financial year, the Company has entered into Service Agreements with Prudential Holdings Limited ("PHL"), an intermediate parent company, which is Prudential Regional Head Office in Asia, for the provision of services and support for both IT and non-IT services to the Company, for a period of five years. In consideration of the provision of services provided by PHL, the Company shall pay to PHL a service fee as set out in the agreements. The agreements can be terminated upon one month written notice and can be extended upon not less than one month written notice prior to the expiry of the term of these agreements by either party.

Events after the reporting period 28

- On 13 December 2018, the National Legislative Assembly passed a bill amending the Labor (a) Protection Act to include a requirement that an employee who is terminated after having been employed by the same employer for an uninterrupted period of twenty years or more, receives severance payment of 400 days of wages at the most recent rate. The Company will amend its retirement plan in the period in which the amendment will have become law and is announced in the Royal Gazette. As a result of this change, the provision for retirement benefits as at that future period end as well as past service cost recognized during that period is estimated to increase by the amount not exceeding Baht 30 million.
- At the Company's Board of Directors' meeting held on 13 March 2019, the Board of Directors (b) approved the Company's application for dividend payment to the Company's shareholders at the amount not exceeding Baht 1,425 million. The dividend shall be paid out from the Company's net profit for the year 2018 and the unappropriated retained earnings. In this regard, it also depends on the approval from the Office of Insurance Commission (OIC).

Thai Financial Reporting Standards (TFRSs) not yet adopted 29

A number of new and revised TFRSs which relevant to the Company's operations and become effective for annual financial reporting periods beginning on or after 1 January of the following years.

TFRS	Topic	Effective
TFRS 4 (revised 2018)	Insurance Contracts	2019
TFRS 7*	Financial Instruments: Disclosures	2020
TFRS 9*	Financial Instruments	2020
TFRS 15	Revenue from Contracts with Customers	2019

Prudential Life Assurance (Thailand) Public Company Limited

Notes to the financial statements

For the year ended 31 December 2018

TFRS	Topic	Effective
TAS 32*	Financial Instruments: Presentation	2020
TFRIC 16*	Hedges of a Net Investment in a Foreign Operation	2020
TFRIC 19*	Extinguishing Financial Liabilities with Equity	2020
	Instruments	
TFRIC 22	Foreign Currency Transactions and Advance	2019
	Consideration	
Accounting Guideline for Fina	ncial Instruments and Disclosure for insurance company	2020

^{*} TFRS - Financial instruments standards

(a) TFRS 4 (revised 2018) Insurance contracts

TFRS 4 allows the insurers which meet conditions as TFRS 4 determine, the insurers can use temporary deferral for application TFRS 9 Financial Instruments and TFRS 7 Financial Instruments Disclosure and insurers have to follow the Accounting Guideline for Financial Instruments and Disclosure for insurance company instead for the reporting periods before on or after 1 January 2022 or before TFRS 17 Insurance contracts is effective.

(b) TFRS 15 Revenue from Contracts with Customers

TFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. Revenue should be recognised when (or as) an entity transfers control over goods or services to a customer, measured at the amount to which the entity expects to be entitled.

The Company has made a preliminary assessment of the potential impact of adopting and initially applying TFRS 15 on the financial statements and expects that there will be no material impact on the financial statements in the period of initial application.

(c) TFRS - Financial instruments standards

These TFRS establish requirements related to definition, recognition, measurement, impairment and derecognition of financial assets and financial liabilities, including accounting for derivatives and hedge accounting.

Management is presently considering the potential impact of adopting and initially applying TFRS - Financial instruments standards on the financial statements.

(d) TFRIC 22 - Foreign Currency Transactions and Advance Consideration

The interpretation clarified that the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) is the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the entity shall determine a date of the transaction for each payment or receipt of advance consideration.
